ConneCT SPECIFICATIONS

DIMENSIONS: L: 2,692 mm (106 in)
W: 1,444 mm (56.9 in)
H: 1,676 mm (66.00 in)

TUNNEL SIZE: W: 620 mm (24.4 in)
H: 420 mm (16.5 in)

WEIGHT: Approx. 1950 kg (4,290 lbs)

... transforming the **future of aviation security**

conneCT™ CHECKPOINT SYSTEM

- ECAC approved and TSA certified -- Global Footprint
- Open architecture platform and networking
- Multiple automated tray return systems
- Optimizes passenger throughput
- Designed for lower total cost of ownership

Security technology that helps airports grow – now, and in the future

Common operating platform

ConneCT's common operating platform shares core features with other Analogic security solutions such as our SeleCT hold baggage screening system.

Result: lower costs, seamless integration, increased revenue velocity.

- Advanced computed tomography detection
- Open architecture supports third party applications

- Common GUI
- Touchscreen interface
- Cyber hardened

- World Class service, support, and logistics

- Energy-efficient design
- Sustainable components
- Reduced carbon footprint

Breakthrough gantry design

Reliable Bearingless Wheel Design reduces cost of ownership. Replaces traditional bearing design and cuts maintenance costs and system downtime.

No competitor offers this!

Replacement takes only 2 hours, by one technician, on-site!

CORE DESIGN PRINCIPLES

ConneCT Gantry Design GAME CHANGER!

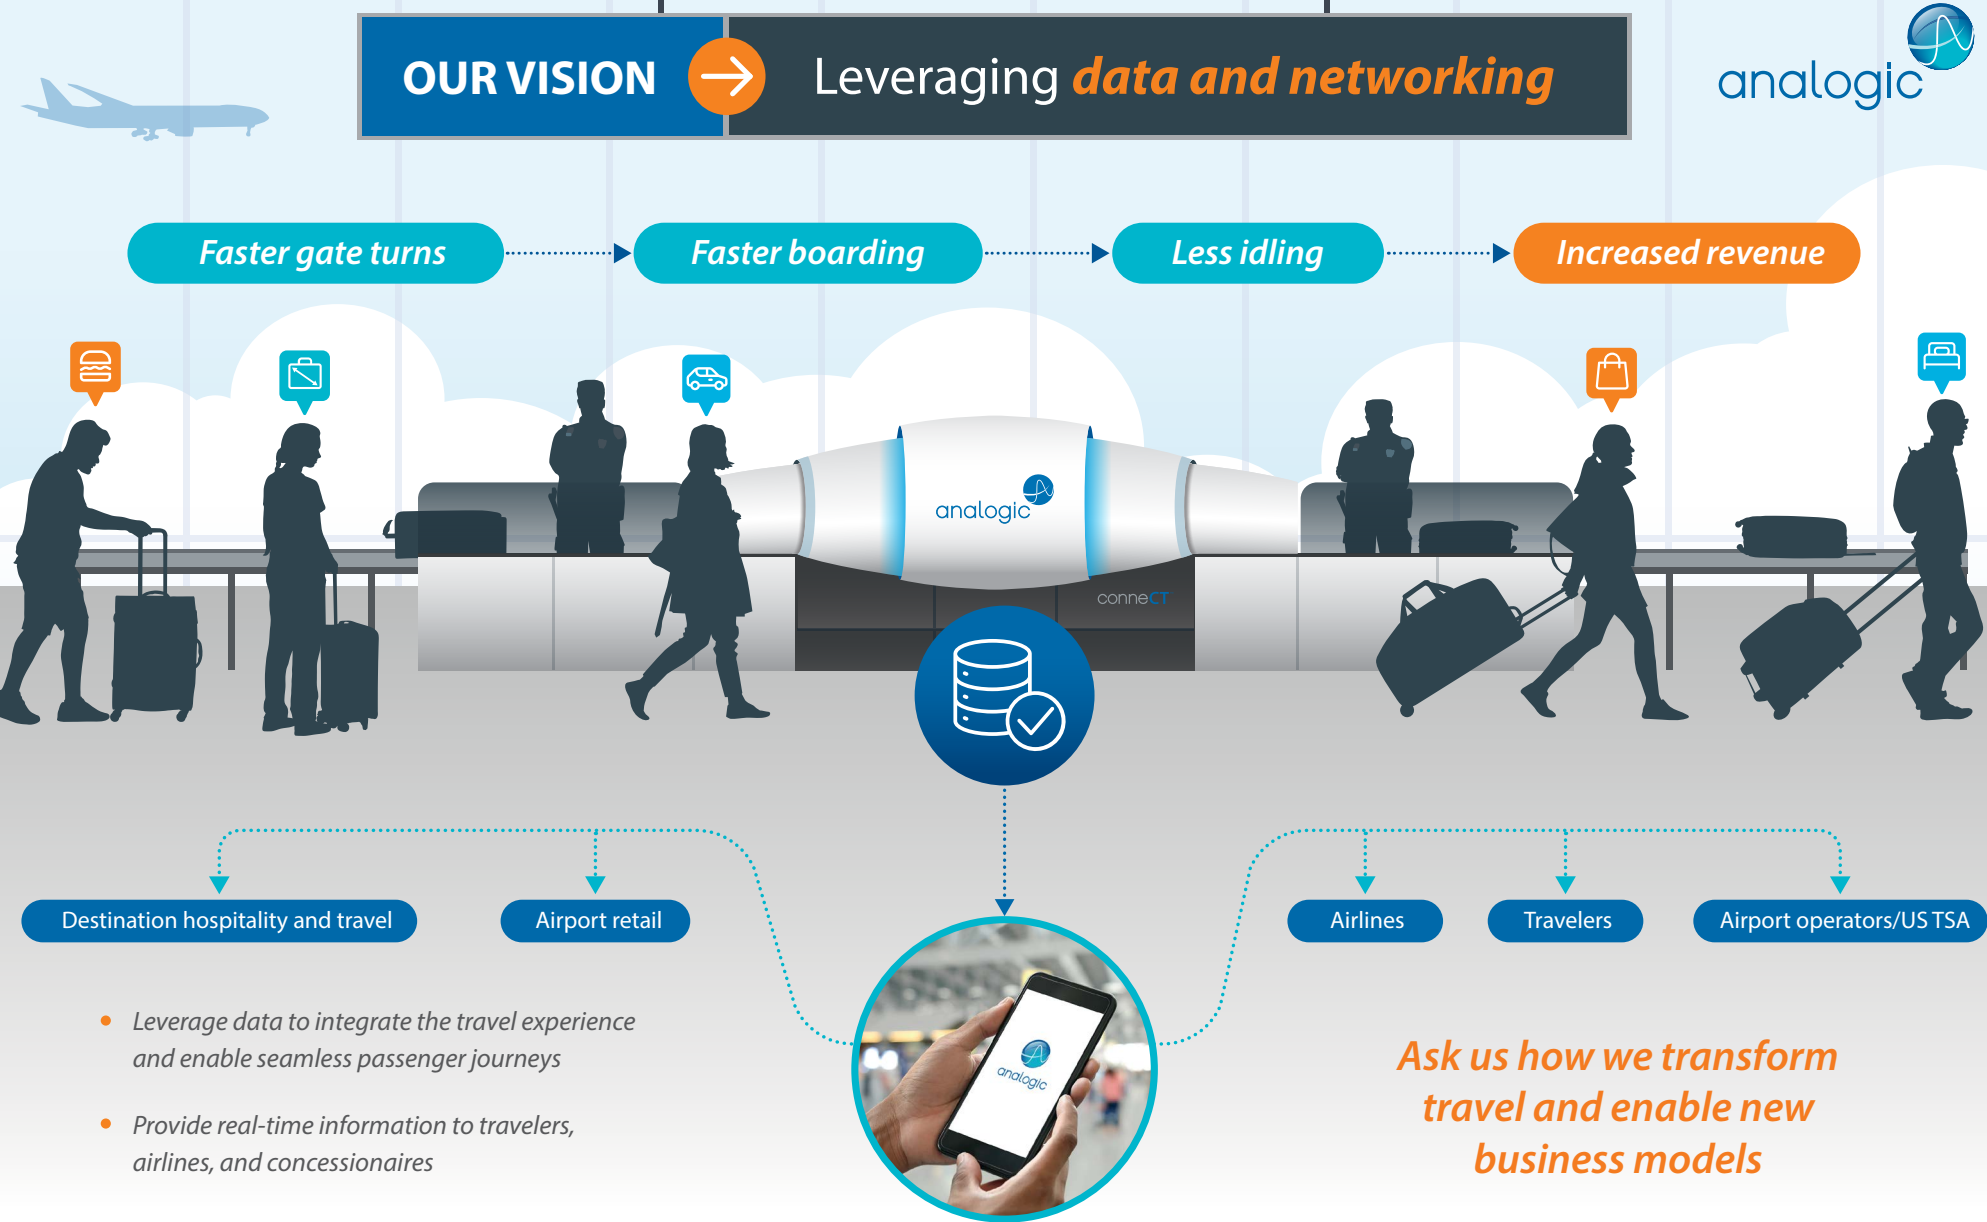

Leveraging networking and multiplexing

Supports networking and multiplexing within an airport, across multiple airports – even internationally.

Enables operational efficiency, revenue-creating applications, new business models.

Supports remote screening solutions to optimize staff productivity and airport real estate.

Airport-wide networking

- Leverage data to integrate the travel experience and enable seamless passenger journeys
- Provide real-time information to travelers, airlines, and concessionaires
